DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 11/1/2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent 6,873,651 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Objections

2. Claims 22, 25 are objected to because of the following informalities:
Claim 22, the preamble recites: "wherein when a signals is..." this should read "wherein when a signal is..." and after the struck-through portion the "a." is not necessary.
Claim 25, the preamble recites: "...to further perform steps of:" should read "...to further perform the step of:" and after the struck-through portion the "a." is not necessary.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 6-14, 24-30 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 6, the preamble recites: "A medium encoded with instructions that, when executed perform a method comprising the steps of:"

According to the [MPEP 2106.01-2106.02] "Data structures not claimed as embodied in computer-readable media are descriptive material *per se* and are not statutory because they are not capable of causing functional change in the computer. See, e.g., *Warmerdam*, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure *per se* held nonstatutory). Such claimed data structures do not define any structural and functional interrelationships between the data structure and other claimed aspects of the invention which permit the data structure's functionality to be realized. In contrast, a claimed computer-readable medium encoded with a data structure defines structural and functional interrelationships between the data structure and the computer software and hardware components which permit the data structure's functionality to be realized, and is thus statutory."

Claims 6 and claim 24 (having a similar preamble) are not statutory. Dependent claims 7-14, 25-30 are also rejected based on a similar rationale.

Allowable Subject Matter

4. Claims 1-5, 15-20, 21-23, 31-32 are allowed over prior art. Claims 6-14, 24-30 would be allowed if they overcome the 35. U.S.C. 101 issues pointed out above.
